

<b>Study program : Electrical Engineering, Mechanical Engineering, Module Industrial Engineering</b>			
Type and level of studies: MSC			
<b>Course unit: Design of information systems and databases</b>			
<b>Teacher in charge : Milan Eric, Miladin Stefanovic</b>			
Language of instruction: English			
ECTS: 6			
Prerequisites: no			
Semester: <i>Winter semester</i>			
<b>Course unit objective:</b> Presentation of computer systems, with a focus on computer hardware, software and computer networks, Detailed clarify purpose of computer and information systems in business offer modern techniques of learning, eLearning, www. Presentation of IS, IS design and DMBS, with a strong emphasis on the Internet, www and Ecommerce environments.			
<b>Learning outcomes of Course unit</b>			
Ensure that students acquire basic knowledge about design of IS and databases. Students will adopt modern concepts such as e-business over the Internet, and to understand role of information systems in modern business and society.			
<b>Course unit contents</b>			
<i>Theoretical classes</i>			
In the framework of theoretical classes will cover the following areas: introduction to the information systems, hardware, software, networks, methods and techniques work in the phase of analysis and specifications of the system, phase design of information systems and applications programming, the basic principles database design, SQL, CASE tools, Internet and www environment, e-business concepts, modern concepts of IS applications.			
<i>Practical classes</i>			
Exercises, Other forms of teaching, research study			
As part of the research study, students will be trained for basic research in the field of cases.			
<b>Literature</b>			
[1] Rob, P., Coronel, C., & Crockett, K. (2008). Database systems: design, implementation & management. Cengage Learning EMEA.

<b>Number of active teaching hours</b>			<b>Other classes 1</b>
Lectures: 2	Practice: 1,6	Other forms of classes:0,4	Independent work:0
<b>Teaching methods</b>			
Classic "frontal" approach combined with group and individual approach with the use of current resources. Evaluation of knowledge will be performed through colloquiums and seminars papers.			
<b>Examination methods ( maximum 100 points)</b>			
<b>Exam prerequisites</b>	<b>No. of points:</b>	<b>Final exam</b>	<b>No. of points:</b>
Student's activity during lectures	10	oral examination	30
practical classes/tests	20	written examination	
Seminars/homework	20	.....	
Project	20		
Other			
<b>Grading system</b>			
<b>Grade</b>	<b>No. of points</b>	<b>Description</b>	
10	91-100	Excellent	
9	81-90	Exceptionally good	
8	71-80	Very good	
7	61-70	Good	
6	51-60	Passing	
5	≤50	Failing
