

# 8th ICCSM

8<sup>th</sup> International Congress of Croatian Society of Mechanics

Organised by

Croatian Society of Mechanics

Under the Auspices of

Central European Association for Computational Mechanics  
University of Rijeka

## Proceedings

of the 8<sup>th</sup> International Congress of Croatian Society of  
Mechanics

Editors:

Ivica Kožar  
Nenad Bićanić  
Gordan Jelenić  
Marko Čanađija

Opatija, Croatia, September 29 – October 2, 2015

Published by  
Croatian Society of Mechanics

Head Office  
Faculty of Mechanical Engineering and Naval Architecture  
University of Zagreb  
Ivana Lučića 5, HR-10000 Zagreb, Croatia

**General chairs**

Ivica KOŽAR, University of Rijeka  
Nenad BIĆANIĆ, University of Rijeka  
Gordan JELENIĆ, University of Rijeka  
Marko ČANAĐIJA, University of Rijeka

**Organising Committee**

Mirjana BOŠNJAK-KLEČINA, University of Osijek  
Marino BRČIĆ, University of Rijeka  
Igor KARŠAJ, University of Zagreb  
Pavao MAROVIĆ, University of Split  
Pejo KONJATIĆ, University of Osijek  
Zdenko TONKOVIĆ, University of Zagreb  
Neira TORIĆ MALIĆ, University of Rijeka

**Scientific Committee**

Giulio ALFANO, Brunel University  
Ivo ALFIREVIĆ, University of Zagreb  
Ferri M.H. ALIABADI, Imperial College, London  
Satya N. ATLURI, University of California, Irvine  
Klaus-Jürgen BATHE, Massachusetts Institute of Technology  
Zdeněk P. BAŽANT, Northwestern University  
Nenad BIĆANIĆ, University of Rijeka  
Josip BRNIĆ, University of Rijeka  
Samir DOLAREVIĆ, University of Sarajevo  
Josef EBERHARDSTEINER, Vienna University of Technology  
António J. M. FERREIRA, University of Porto  
Ugo GALVANETTO, University of Padua  
Marc GEERS, Technische Universiteit Eindhoven  
Jean-Michel GHIDAGLIA, Ecole Normale Supérieure de Cachan  
Friedrich GRUTTMANN, Technical University Darmstadt  
Hu HAIYAN, Beijing Institute of Technology  
Gerhard A. HOLZAPFEL, Graz University of Technology  
Adnan IBRAHIMBEGOVIĆ, UT Compiègne/ Sorbonne Universities  
Alojz IVANKOVIĆ, University College Dublin  
Stjepan JECIĆ, University of Zagreb  
Miloš KOJIĆ, Harvard School of Public Health  
Jože KORELC, University of Ljubljana  
Dražan KOZAK, University of Osijek  
Wilfried B. KRÄTZIG, Ruhr-Universität Bochum  
Lovre KRSTULOVIĆ-OPARA, University of Split  
Lars-Erik LINDGREN, Luleå University of Technology  
Tomasz ŁODYGOWSKI, Poznan University of Technology

8<sup>th</sup> International Congress of Croatian Society of Mechanics  
29 September – 2 October 2015  
Opatija, Croatia

Vlado LUBARDA,	University of California, San Diego
Herbert A. MANG,	Vienna University of Technology
Pavao MAROVIĆ,	University of Split
Franjo MATEJIČEK,	University of Osijek
Hermann G. MATTHIES,	Technical University Braunschweig
Jörn MOSLER,	Technical University Dortmund
Justin MURIN,	Slovak Technical University
Alfonso NAPPI,	University of Trieste
Bojan NIČENO,	Paul Scherrer Institute, Villigen
Roger J. OWEN,	Swansea University
Joško OŽBOLT,	University of Stuttgart
Anna PANDOLFI,	Politecnico di Milano
Đorđe PERIĆ,	Swansea University
Pavel POLACH,	Research and Testing Institute Plzeň
Ekkehard RAMM,	University of Stuttgart
Franz G. RAMMERSTORFER,	Vienna University of Technology
Zoran REN,	University of Maribor
Carlo SANSOUR,	University of Nottingham
Ivo SENJANOVIĆ,	University of Zagreb
Vladimir SIGMUND,	University of Osijek
Jan SLADEK,	Slovak Academy of Sciences
Jurica SORIĆ,	University of Zagreb
Laurent STAINIER,	Ecole Centrale de Nantes
Leopold ŠKERGET,	University of Maribor
Boris ŠTOK,	University of Ljubljana
Zdenko TONKOVIĆ,	University of Zagreb
Rade VIGNJEVIĆ,	Cranfield University
Zdravko VIRAG,	University of Zagreb
Werner WAGNER,	Karlsruhe Institute of Technology
Peter WRIGGERS,	Leibniz University of Hannover
Wolfhard ZAHLTEN,	University of Wuppertal

## TABLE OF CONTENTS

### Invited Lectures

*Alfano, G.*

**Cohesive-zone models and the physics of fracture**

*Hu, H.*

**Dynamic modeling and simulation of large deployable space structures**

*Ibrahimbegovic, A., Nikolic, M., Marenic, E., Ayhan, N., Brancherie, D.*

**Multiscale analysis of localized failure with coupled damage-plasticity and combined ED-FEM and X-FEM approach**

*Krätzig, W.B.*

**Computer simulation of multi-physical processes in solar updraft power technology**

*Mosler, J.*

**On the modeling of sharp and diffuse material interfaces – variational formulations**

*Pandolfi, A., Mitchell, S., Ortiz, M.*

**Elastic and brittle behavior of metaconcrete**

*Pearce, C.*

**Smooth crack propagation for static and dynamic crack propagation**

*Wriggers, P.*

**Material modeling based on multiscale analysis**

### Contributed lectures

*Anđelić, N., Pavlovic, A., Braut, S.*

**Variation of natural frequencies by circular saw blade rotation**

*Bögöly, G., Szakály, F., Varró, R., Berecz, A., Görög, P.*

**Experimental and numerical analysis of small scale masonry arches**

*Bohdal, L.*

**Modelling of guillotining process with the method of smoothed particle hydrodynamics**

*Bombace, N., Knell, S., Barbieri, E., Petrinic, N.,*

**Dynamic adaptive concurrent multi-scale simulation of stress wave propagation in brittle materials**

*Brčić, M., Čanađija, M., Brnić, J.*

**Influence of imperfections on mechanical properties of carbon nanotube reinforced polymer matrix nanocomposites**

*Bubalo, A., Zorica, D., Tonković, Z.*

**Numerical and experimental investigations of wire crimping process**

*Buljac, A., Pospíšil, S., Kozmar, H.*

**Influence of vehicles on bridge aeroelastic stability**

*Buljac, A., Taillandier Thomas, T., Morgeneyer, T.F., Helfen, L., Roux, S., Hild, F.*

**In situ observation of strain localization and ductile damage evolution in thin Al alloy**

*Buljak, V., Cocchetti, G., Cornaggia, A., Maier, G.*

**Residual stresses estimation by “small punch” experiment**

*Camenen, J.F., Čeh, N., Koziara, T., Bićanić, N.*

**Dynamic sensitivity of a multi-block assembly subjected to horizontal harmonic excitation**

*Cvitanić, V., Kovačić, M.*

**Algorithmic formulation for evolutionary anisotropic plasticity model for sheet metals**

*Čeh, N., Jelenić, G.*

**Rocking motion of a single rigid rectangular block – analysis of the block slenderness assumption**

*Čeh, N., Pellegrino, A., Camenen, J.F., Bićanić, N., Petrinić, N., Tuhtan, M.*

**Overturning of multiple-block stacks - dynamic sensitivity parameters and scaling effect**

*Chodor, J., Patyk, R., Kulakowska, A.*

**Researches of the influence of cutting edge radius on the minimum thickness of the machined layer based on 41Cr4 steel**

*de Cola, F., Pellegrino, A., Petrinic, N.*

**Experimental observation of the influence of the grains shapes on the rate dependent behavior of quartz sand**

*Demšić, M., Raduka, V., Škrtić, K.*

**Frequencies and modal shapes of cable-stayed system**

*Divić, V., Peroš, B., Boko, I.*

**Simulations of membrane failure using combined finite and discrete element method**

*Falco, S., Todd, R., Petrinic, N.*

**Numerical modelling of inter-granular crack propagation under dynamic loading conditions**

*Fan, S.C., Yu, Q.J., Lee, C.K.*

**Effect of earth cover to the breakup of magazine subjected to accidental explosion**

*Fligiel, M.*

**Values of limiting criteria of the most convenient supporting construction**

*Forgács, T., Sarhosis, V., Bagi, K.*

**Influence of construction method on the mechanical behaviour of skewed masonry arches**

*Fragassa, C., Žigulić, R., Braut, S.*

**Effect of design parameters in circular saw blades**

*Gaćeša, M., Jelenić, G.*

**Strain-invariant and path-independent modified fixed-pole non-linear beam finite element**

*Galić, M., Marović, P.*

**Validation of the developed triaxial nonlinear material model for concrete**

*Gambirasio, L., Mirabella Roberti, G., Rizzi, E.*

**FEM investigation on a flat-jack test setup for local shear characterization in masonry panels**

*Gubeljak, N., Likeb, A., Matvienko, Y.G., Rakin, M., Međo, B., Damjanović, D., Kozak, D.*

**Fracture behavior of new pipe – ring specimens for fracture toughness testing of thin – wall pipeline**

*Hajžman, M., Rychecký, D., Polach, P.*

**Development of the methodology for the vibration analysis of bladed disks**

*Halama, R., Fusek, M., Fojtík, F., Adámková, L., Ličková, D.*

**Experimental fatigue study of 2124T851 aluminum alloy in low-cycle domain**

*Hell, S., Becker, W.*

**Analysis of three-dimensional crack configurations in composite laminates using the scaled boundary finite element method**

*Hristovska, E.*

**Guidelines for modelling lattice girder structures with cantilever design**

*Jalušić, B., Jarak, T., Sorić, J.*

**On the optimization of shape parameters in the local radial point interpolation collocation method for modeling of heterogeneous materials**

*Jarak, T., Pustaić, D., Lovrenić-Jugović, M.*

**Verification of numerical creep analysis of thick-walled pressure vessels and piping**

*Jelenić, G., Papa Dukić, E., Ribarić, D., Škec, L.*

**Reference linear solution for thick curved beam finite element with constant curvature**

*Jurčić, M., Kožar, I., Simonetti, D.*

**Determination of the reliability index for a reinforced concrete structure**

*Juretić, F., Kozmar, H.*

**Computational modeling of flow and turbulence in the atmospheric boundary layer**

*Kotšmíd, S., Beňo, P., Kozak, D.*

**Effect of a tube flattening on the value of critical buckling force**

*Kozmar, H., Allori, D., Bartoli, G., Borri, C.*

**Experiments on wind-turbine wake in complex terrain**

*Kožar, I., Cuclić, M.*

**Model of radiated heating of urban pavement**

*Kožar, I., Lozzi-Kožar, D.*

**Flux determination using finite elements**

*Kožar, I., Rukavina, T.*

**Structural parameters determination using inverse method**

*Kožar, I., Rukavina, T., Torić Malić, N.*

**Scaling of structures: an engineering approach**

*Kraus, I., Papić, J., Džakić, D.*

**Shear wave velocity as a key parameter that steer seismic structural design**

*Krstulović-Opara, L., Surjak, M., Vesenjaj, M., Tonković, Z., Frančeski, J., Kodvanj, J., Domazet, Ž.*

**Determination of material properties using dynamic tests supported by thermography, digital image correlation and numerical simulation**

*Kšišan, J., Vodička, R., Mantič, V.*

**A new cohesive interface model coupling the interface damage and Coulomb friction. An application to fibre-matrix composites**

*Kukielka, K., Kukielka, L., Gotowala, K.*

**Numerical analysis the state of elastic/visco-plastic strain in the external round thread rolled on cold**

*Kulakowska, A., Patyk, R., Chodor, J.*

**Modeling and numerical simulation of burnishing rolling process of rough surface**

*Lengyel, G., Bagi, K.*

**Effects of support displacements of pointed vaults**

*Lepri, P., Kozmar, H., Večenaj, Ž., Grisogono, B.*

**A summertime near-ground turbulence of the bora wind**

*Lesičar, T., Tonković, Z., Sorić, J.*

**C1 microlevel second-order computational homogenization**

*Lißner, M., Cui, H., Petrinic, N.*

**Simulation of high-rate experiments for characterisation of bonded interfaces**

*Lukić, L., Nedić, N., Pršić, D., Petrović, Z.*

**NC programming system for interpolation of tools' circular trajectories during multi-axis wood machining**

*Marenić, E., Brancherie, D., Bonnet, M.*

**Multiscale asymptotic-expansion-based modeling of local material inhomogeneities**

*Marović, P., Galić, M., Putnik, G., Ljubas, M.*

**Deflection determination of the cantilever with variable circular hollow cross-section**

*Matošević, Đ., Hadzima-Nyarko, M., Gazić, G.*

**Experimental investigation of shear stress of masonry mortar joints**

*Matthies, H.G., Rosic, B., Sykora, J., Pajonk, O., Kučerová, A., Litvinenko, A.*  
**Inverse problems and bayesian updating**

*Milas, Z., Penga, Ž.*  
**Numerical simulation of fan flow**

*Miljanović, S., Zlatar, M.*  
**Parametric analysis of prestressed hybrid systems**

*Montanari, M., de Cola, F., Murugaratnam, K., Barbieri, E., Petrinic, N.*  
**Multilevel contact detection search: GJK algorithm applied to granular media consolidation**

*Munjas, N., Čanađija, M., Brnić, J.*  
**Thermo-mechanical multiscale modeling in plasticity of metals**

*Murin, J., Aminbaghai, M., Hrabovsky, J., Kutis, V., Paulech, J.*  
**3D beam finite element for elasto-static analysis of the FGM structures**

*Nedić, N., Lukić, Lj., Pršić, D., Stojanović, V., Dubonjić, D.*  
**Analysis and simulation of Stewart platform manipulator behavior driven by pneumatic cylinders applied in wood processing**

*Ožbolt, J., Bede, N., Sharma, A., Mayer, U.*  
**Dynamic fracture of concrete: experimental and numerical study on L-specimen**

*Parrinello, A.F., Pellegrino, A., Todd, R., Petrinic, N.*  
**Characterization of ceramic composites under dynamic compression by means of split Hopkinson pressure bar and high-speed imaging**

*Patyk, R., Patyk, S.*  
**Determination of embossing process force of regular asperities on cylindrical surface**

*Pavazza, R., Vlak, F., Vukasović, M., Šojat, A.*  
**On the application of single Fourier series in the analysis of thin-walled beams subjected to bending**

*Pellegrino, A., de Cola, F., Petrinic, N.*  
**The mechanical response of etnean volcanic ash and rocks to impact loading**

*Penava, D., Sigmund, V., Kožar, I.*  
**Use of simplified micro-model of framed-walls with openings for evaluation of shear resistance capacity of members**

*Penava, D., Sigmund, V., Kožar, I., Anić, F., Trajber, D., Vig, M.*  
**Spatial micro model of the masonry wall**

*Petrík, M., Vodička, R.*

**Numerical model of delamination in two-layered structures of orthotropic materials**

*Petruska, J., Navrat, T.*

**Straightening of circular bars – simulation and experiment**

*Piculin, S., Ber, B., Brank, B.*

**Structural adhesives: material models, material tests and finite element simulations**

*Polach, P., Hajžman, M., Dupal, J.*

**Influence of the fibre damping model in a simple mechanical system on the coincidence with the experimental measurement results**

*Pustaić, D., Pustaić, M.*

**Torsion of a circular cross section shaft in the steady-state creep conditions**

*Putar, F., Lesičar, T., Sorić, J., Tonković, Z.*

**Damage modeling using higher-order finite element formulation**

*Rammerstorfer, F.G., Toth, F.*

**Simulating the evolution of crack patterns and buckles in thin metallic films**

*Ribarić, D.*

**A four-node plate element with assumed shear strain that satisfy the patch test**

*Rosic, B., Matthies, H.G.*

**Uncertainty quantification methods for elastoplastic problems described by uncertain parameters**

*Rukavina, T., Kožar, I.*

**Analysis of two bodies sliding along a cable with delay**

*Sedlar, D., Lozina, Ž., Tomac, I.*

**Optimization of truss structures using basic variable neighbourhood search**

*Shamass, R., Alfano, G., Guarracino, F.*

**Numerical and analytical investigation into the plastic buckling paradox for metal cylinders**

*Skozrit, I., Tonković, Z., Krstulović-Opara, L., Surjak, M., Vesenjak, M., Čanžar, P.*

**Damage initiation and evolution in nodular cast iron for wind turbine components**

*Sladek, J., Bishay, P.L., Repka, M., Sladek, V.*

**Hybrid/mixed finite elements for crack analyses in elastic solids with voids**

*Nikolić, Ž., Smoljanović, H., Živaljić, N.*

**Numerical analysis of masonry structures by finite discrete element model**

*Springis, G., Rudzitis, J., Kandis, J.*

**The number of rough surface peaks necessary for wear calculations**

*Szakály, F., Bagi, K.*

**Quasi-static modelling of masonry structures**

*Szijarto, R., Niceno, B., Prasser, H.M.*

**Condensation of steam in horizontal pipes**

*Šćulac, P., Jelenić, G., Grandić, D.*

**Modelling cracking in RC tensile members using an embedded-crack beam finite element**

*Škec, L., Jelenić, G.*

**A non-linear finite element formulation for a multi-layer beam with mixed-mode delamination between layers**

*Torić Malić, N., Kožar, I.*

**Vehicle-structure interaction analysis with modified finite strip method**

*Urevc, J., Flis, V., Brumen, M., Štok, B.*

**The usage of a thermomechanical analogy in modelling of a patient-specific arterial residual stress state**

*Vesenjak, M., Borovinšek, M., Kovačič, A., Ulbin, M., Krstulović-Opara, L., Ren, Z.*

**Geometrical and mechanical analysis of porous structures**

*Virag, L., Vindiš, V., Humphrey, J.D., Karšaj, I.*

**Implementation of thrombus-laden abdominal aortic aneurysms into finite element code**

*Weißenfels, C., Wriggers, P.*

**A meshfree Galerkin method based on barycentric coordinates**

*Wesolowski, F., Zehn, M.W.*

**Application of Krylov Subspace Reduction Methods in Frequency Based Substructuring**

*Vukasović, M., Pavazza, R., Vlak, F.*

**An analytic solution for the stresses and displacements of thin-walled cross-ply composite beams subjected to bending**

*Vukelić, G., Brnić, J.*

**Mechanical properties determination and crack behavior prediction for steels 1.4057 and 1.7225**

*Wriggers, P., Rust, W.T., Reddy, B.D.*

**Application of the virtual element method to non-conforming contact interfaces**

*Yevtushenko, A., Kuciej, M., Och, E.*

**Distribution of temperature in braking system with thermosensitive materials and pressure fluctuations**

*Yevtushenko, A., Kuciej, M., Yevtushenko, O., Och, E.*

**Impact of changes in friction coefficient and thermal properties of materials on the evolution of the temperature in braking system**

*Zaccariotto, M., Sarego, G., Dipasquale, D., Galvanetto, U.*

**Strategies for fatigue damage modeling with peridynamics**

*Zaimovic, A., Medic, S., Dolarevic, S.*

**Static and dynamic analysis of nonlinear elastic cables**

*Zupan, E., Zupan, D.*

**Higher order reconstruction of rotational quaternions from angular velocities**

*Žigulić, R., Fragassa, C., Skoblar, A.*

**A nonlinear vibrational model of the woodworking bandsaw**

\* Full papers can be found on this DVD. The family name of the first author is used as the file name. The abstract substitutes the full paper in all cases when the full paper was not submitted
